

ASEBA[®]

Achenbach System of
Empirically Based Assessment

2023 Catalog

Introductory & How-To Videos (p. 3)

Brief videos quickly teach you what you need to know, including:

- Introduction to the ASEBA[®]
- Getting started
- Assessing diverse clients
- Setting up, installing software, logging in
- Administering & scoring forms
- Displaying scored profiles

Gender-Inclusive Assessment Using the ASEBA (p. 3)

- ASEBA[®] paper forms & ASEBA-Web provide gender-inclusive wording
- Gender-inclusive scores are computed for all scales
- *Guide to Gender-Inclusive Assessment Using the ASEBA[®]*

Valuable Tools for Evidence-Based Practice

Ages 1½-5 (pp. 6-7):

- Child Behavior Checklist/1½-5
- Language Development Survey
- Caregiver-Teacher Report Form

Ages 6-18 (pp. 8-9, 18):

- Brief Problem Monitor/6-18
- Child Behavior Checklist/6-18
- Teacher's Report Form
- Youth Self-Report
- Semistructured Clinical Interview
- Test Observation Form

Ages 18-59 (pp. 10-11):

- Brief Problem Monitor/18-59
- Adult Self-Report
- Adult Behavior Checklist

Ages 60-90+ (p. 12):

- Older Adult Self-Report
- Older Adult Behavior Checklist

ASEBA®

Integrated, Multi-Informant, Evidence-Based Assessment for Ages 1½ to 90+

The Worldwide Standard for Evidence-Based Assessment Translations in Over 110 Languages

The ASEBA is a comprehensive evidence-based assessment system developed through decades of research and practical experience. The ASEBA assesses competencies, adaptive functioning, personal strengths, and behavioral, emotional, social, and thought problems – including transdiagnostic general psychopathology (p) – from age 1½ to 90+ years. Ideal for intake, progress, and outcome assessments.

Gender-Inclusive Assessment

Gender-Inclusive Designations

To take account of diverse concepts of gender, the *Gender* field on current versions of ASEBA paper forms (including forms printed from ASEBA-Web) is open-ended. On ASEBA-Web, the field for *Gender* includes *Another* as an open-ended option where respondents can specify the assessed person's gender identification. When users score forms via ASEBA-PC, -Network, or -Web, they can select female norms, male norms, Integrated Norm-Referenced Scoring, or gender-neutral raw scale scores. The *Guide to Gender-Inclusive Assessment Using the ASEBA* (see p. 11) explains and illustrates these options.

Gender-Inclusive Scale Scores

With Integrated Norm-Referenced Scoring, ASEBA software determines whether the *T* score on each problem scale would be higher for female or male norms. It then assigns the higher *T* score. For strengths scales, the software assigns the lower of the *T* scores for female or male norms. Gender-neutral raw scale scores are the sums of the items comprising the scale. On hand-scored profiles, the gender-neutral score is displayed beneath the scale in the space labeled *Total*. On computer-scored profiles, the gender-neutral scale score is displayed beneath the scale's bar graph in the space labeled *Raw Score*.

New to ASEBA?

About the ASEBA

- Clearly documents clients' functioning via quantitative scores and individualized descriptions in respondents' own words
- Practical applications and research studies reported in over 10,000 publications from over 100 societies and cultural groups
- Translations in over 110 languages
- Gender-, age-, informant-, and multicultural norms, including for transdiagnostic general psychopathology (p)
- Research on clients' needs, progress, and outcomes; diagnoses; epidemiology; medical conditions; treatment; genetic and environmental effects; cultural variations; abuse; ADHD; HIV; OCD; PTSD; SCT; and much more
- Used in mental health services; schools; medical settings; child and family services; public health agencies; child guidance; training; research; and many other contexts

If you are new to our assessment instruments, it's easy to begin with a starter kit. The kits contain all the products you need to start assessments, packaged together at money-saving discounts. Select the starter kit that's right for you. See page 14 for comparisons between hand-scoring and scoring via software.

ASEBA-Web enables paperless online form completion by informants (p. 15)

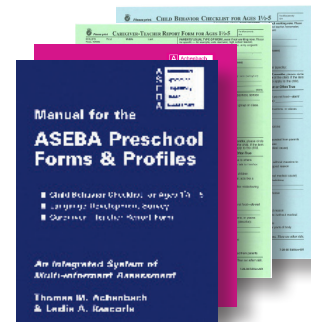

Preschool Computer-Scoring Starter Kit

Item # 621 includes:

ASEBA-PC Module with Multicultural Options for Ages 1½-5; *Manual for Preschool Forms and Profiles*; *Multicultural Supplement to the Manual*; 50 each of CBCL/1½-5-LDS and C-TRF forms

For Preschool Hand-Scoring Starter Kit, see p. 6

For more information on preschool assessments, see pp. 6-7 or visit www.aseba.org/preschool/

School-Age Computer-Scoring Starter Kit

Item # 031 includes:

ASEBA-PC Module with Multicultural Options for Ages 6-18; *Manual for School-Age Forms and Profiles*; *Multicultural Supplement to the Manual*; 50 each of CBCL/6-18, TRF/6-18, and YSR/11-18 forms

For School-Age Hand-Scoring products, see p. 9

For more information on school-age assessments, see pp. 8-9 or visit www.aseba.org/school-age/

Brief Problem Monitors for Ages 6-18 and 18-59 Computer-Scoring Starter Kits

BPM/6-18 Item # 133 Starter Kit includes:

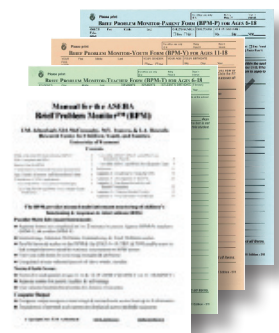

BPM/6-18 Module; *Manual*; 50 each of BPM-P, BPM-T, and BPM-Y forms

For more information, see p. 9, or visit www.aseba.org/school-age-bpm/

BPM/18-59 Item # 117 Starter Kit includes:

BPM/18-59 Module; *Manual*; 50 forms designed for self- and collateral-ratings

For more information, see p. 11, or visit www.aseba.org/adult-bpm18-59/

ASEBA-Web enables paperless online form completion by informants (p. 15)

Adult Computer-Scoring Starter Kit

Item # 101 includes:

ASEBA-PC Module with Multicultural Options for Ages 18-59; *Manual for Adult Forms and Profiles*; *Multicultural Supplement to the Manual*; 50 each of ABCL/18-59 and ASR/18-59 forms

For Adult Hand-Scoring Starter Kit, see p. 10

For more information on adult assessments, see pp. 10-11 or visit www.aseba.org/adults/

Older Adult Computer-Scoring Starter Kit

Item # 029 includes:

ASEBA-PC Module for Ages 60-90+; *Manual for Older Adult Forms and Profiles*; *Multicultural Supplement to the Manual*; 50 each of OABCL/60-90+ and OASR/60-90+ forms

For Older Adult Hand-Scoring Starter Kit, see p. 12

For more information on older adult assessments, see p. 12 or visit www.aseba.org/older-adults/

Semistructured Clinical Interview for Children and Adolescents (SCICA)

SCICA Hand-Scoring products, order separately:

SCICA Manual on CD or via e-delivery; Protocol forms, Observation and Self-Report rating and Profile forms

For more information on the SCICA, see p. 18 or visit www.aseba.org/school-age-scica/

Test Observation Form (TOF) Hand-Scoring Starter Kit

Item # 419 includes:

50 TOF Forms, 50 of each Profile, and *TOF Manual*

For more information on the Test Observation Form, see p. 18 or visit www.aseba.org/observational-assessments/

Preschool

Ages 1½-5

The preschool forms and profiles span ages 1½-5 years. The empirically based syndromes scored from the CBCL/1½-5 and C-TRF reflect actual patterns of problems derived from factor analyses that were coordinated between the two instruments. The CBCL/1½-5 also has a *Sleep Problems* syndrome. Both forms have parallel *Internalizing*, *Externalizing*, and *Total Problems* scales plus the *Stress Problems* scale added in 2010. This scale comprises items that discriminate between children who have versus have not experienced severe stress. Because chronic stressors (such as abuse and neglect) are especially relevant to preschoolers, the stress problems scale assesses a broader spectrum of problems than implied by PTSD alone.

An especially valuable feature of the CBCL/1½-5 is the *Language Development Survey* (LDS), which uses parents' reports to assess children's expressive vocabularies and word combinations, as well as risk factors for language delays. Based on a U.S. national normative sample, the LDS indicates whether a child's vocabulary and word combinations are delayed relative to norms for ages 18-35 months.

- CBCL/1½-5-LDS completed by parents or surrogates in 10-15 minutes
- C-TRF completed by daycare providers and preschool teachers in 10 minutes
- Empirically based syndromes are based on factor analyses coordinated between the CBCL/1½-5 and C-TRF
- DSM-5-oriented scales (including *Autism Spectrum Problems*) are based on judgments by experts from many societies
- Multicultural norms available for 30 societies, see p. 7
- Cross-informant comparisons of CBCL/1½-5 and C-TRF scores from up to 10 forms for intake, progress, and outcomes assessments

Multicultural Supplement to the Manual for the ASEBA Preschool Forms and Profiles

Multicultural norms for ages 1½-5, plus the Stress Problems scale and research updates based on hundreds of published studies

Based on over 30,000 CBCLs and C-TRFs from 30 societies, the *ASEBA-PC Module with Multicultural Options for Ages 1½-5* scores problem scales with norms for societies that have relatively low problem scores (Group 1 societies), intermediate scores (Group 2), or high scores (Group 3). You can select societies by name or by Group 1, 2, or 3 norms for profiles of syndrome, DSM-oriented, *Stress Problems*, *Internalizing*, *Externalizing*, and *Total Problems* scales. You can also select norms for displaying scale scores in cross-informant bar graphs for up to 10 CBCLs and C-TRFs per child. Scores from each form can even be displayed in relation to more than one set of norms; e.g., you can display scores from a CBCL completed by an immigrant parent with norms for the parent's home society and then with the host society norms. You can thus see whether scores are clinically deviant according to either or both sets of norms.

The *Multicultural Supplement to the Manual for the ASEBA Preschool Forms and Profiles* fully explains the multicultural norms for the CBCL/1½-5 and C-TRF. The *Supplement* illustrates multicultural scoring, cross-informant comparisons, and practical applications in school, mental health, medical, and forensic contexts. The *Supplement* also reports multicultural findings for confirmatory factor analyses, internal consistencies, cross-informant correlations, and distributions of scale scores. The *Supplement* provides updates for the *Language Development Survey* (LDS) of the CBCL/1½-5. Research guidelines and extensive reviews of research on the instruments are also provided, plus a bibliography of over 300 publications reporting their use with young children.

- **Syndrome Scales:** *Emotionally Reactive; Anxious/Depressed; Somatic Complaints; Withdrawn; Sleep Problems* (CBCL only); *Attention Problems; Aggressive Behavior*
- **DSM-Oriented Scales:** *Depressive Problems; Anxiety Problems; Autism Spectrum Problems; Attention Deficit/Hyperactivity Problems; Oppositional Defiant Problems*

School Age

Ages 6-18

For additional school-age information, visit www.aseba.org/school-age/

Child Behavior Checklist for Ages 6-18 (CBCL/6-18)

Teacher's Report Form (TRF)

Youth Self-Report (YSR)

Brief Problem Monitor (BPM/6-18)

Syndrome Scales Derived from Factor Analyses

Anxious/Depressed, Withdrawn/Depressed, Somatic Complaints, Social Problems, Thought Problems, Attention Problems, Rule-Breaking Behavior, and Aggressive Behavior

All forms have *Internalizing*, *Externalizing*, and *Total Problems* scales. The TRF additionally has *Inattention* and *Hyperactivity-Impulsivity* sub-syndrome scales, which comprise the *Attention Problems* scale.

DSM-5-Oriented Scales Based on Experts' Judgements

Depressive Problems, Anxiety Problems, Somatic Problems, Attention Deficit/Hyperactivity Problems, Oppositional Defiant Problems, and Conduct Problems

Competence and Adaptive Scales

CBCL/6-18 and YSR *Activities, Social, School, and Total Competence* scales. TRF *Academic Performance* and *Adaptive Functioning* scales

The *Manual for the ASEBA School-Age Forms & Profiles* details the scales, plus clinical and research applications.

The *ASEBA-PC Module with Multicultural Options for Ages 6-18* displays scores on profiles in relation to age- and gender-specific norms for user-selected societies (including U.S.), plus:

- Cross-informant comparisons of problem item ratings and scale scores for up to 10 CBCL/6-18, TRF, and YSR forms for intake, progress, and outcome assessments
- Correlations between ratings by each pair of informants
- Bar graph comparisons of normed scale scores for up to 10 informants
- Scales for *Obsessive-Compulsive Problems, Stress Problems, Sluggish Cognitive Tempo* (not on YSR), and *Positive Qualities* (YSR only)

ASEBA-Web enables paperless online form completion by informants (p. 15)

Multicultural Norms

Indigenous researchers in over 50 societies obtained CBCL/6-18, TRF, and YSR ratings of many thousands of children and youths. Confirmatory factor analyses (CFAs) of the ratings support the empirically based syndromes. The ratings are embodied in multicultural norms, enabling users of the *Module with Multicultural Options for Ages 6-18* to display CBCL/6-18, TRF, and YSR scale scores with norms for user-selected societies.

Multicultural Cross-Informant Bar Graphs

The bars for scale scores obtained from each informant are normed in relation to user-selected societies, as well as the child's gender, age, and the type of informant.

Multicultural Supplement

The *Multicultural Supplement* explains the development and use of the multicultural norms, including:

- Sources of multicultural data
- Research basis for multicultural norms
- Confirmatory factor analyses supporting CBCL/6-18, TRF, and YSR syndromes in dozens of societies
- Construction of *Obsessive-Compulsive Problems, Stress Problems, Sluggish Cognitive Tempo, and Positive Qualities* scales
- Multicultural cross-informant correlations and internal consistencies
- Multicultural case illustrations in mental health, school, medical, and forensic settings
- Multicultural research applications

Brief Problem Monitor

For Ages 6-18 (BPM/6-18)

Available in ASEBA-Web, -PC, and -Network

BPM/6-18 forms are completed by parents, teachers, or youths in 1-2 minutes to rate functioning over user-specified periods of days, weeks, or months. The items are from the CBCL/6-18, TRF, and YSR. They are scored on *Internalizing* (INT), *Attention Problems* (ATT), *Externalizing* (EXT), and *Total Problems* (TOT) scales.

Linking the BPM/6-18 with Comprehensive Assessments

Brief assessments can evaluate responses to interventions (RTIs) and can monitor functioning in school, inpatient, partial hospitalization, residential, and other settings. To optimize their value, brief assessments should be linked to comprehensive initial assessments for pinpointing specific needs and for designing interventions. The BPM/6-18 counterparts of CBCL/6-18, TRF, and YSR items and scales enable users to link BPM/6-18 assessments closely with the comprehensive initial and outcome assessments afforded by the CBCL/6-18, TRF, and YSR.

Cross-Informant Comparisons

The BPM/6-18 module compares item ratings and scale scores across up to 4 informants on each rating occasion for up to 10 occasions.

Trajectories of Scale Scores

As shown below, the software displays trajectory graphs of scale scores obtained from each informant on up to 10 occasions.

The Importance of Norms

To help users evaluate scale scores, the BPM/6-18 software displays *T* scores based on gender, age, and informant-specific norms (parent, teacher, self). Multicultural options enable users to select norms for dozens of societies. Normed graphs indicate scores that are high enough to be of concern.

Informant Comments & User-Added Items

Informants can write comments to be entered and stored in the BPM/6-18 software. Users can add up to 3 problems and/or strengths to be rated and then displayed in output.

For additional BPM/6-18 information, visit www.aseba.org/school-age-bpm/

Adults

Ages 18-59

Adult Self Report (ASR)

Adult Behavior Checklist (ABCL)

Brief Problem Monitor (BPM/18-59)

Multicultural Norms

Multicultural Supplement

The Adult Self-Report (ASR) assesses adaptive functioning, strengths, and problems. The parallel Adult Behavior Checklist (ABCL) obtains assessment data from people who know the adult. Both forms are valuable for intake, progress, and outcome assessments in mental health, family, couples, forensic, college counseling, medical, substance abuse, and other services.

Multicultural norms enable you to display scale scores in relation to norms for many societies, as detailed in the *Multicultural Supplement to the Manual for the ASEBA Adult Forms & Profiles*.

The ASR and ABCL are especially valuable for assessing parents in family-oriented services where children are assessed with ASEBA instruments. When parents complete the ASR to describe themselves and the ABCL to describe their partner, the data can be entered into the MFAM (p. 13) along with CBCL/6-18, TRF, and YSR data for their child(ren). MFAM comparisons between parent and child scores can reveal parent-child patterns to which interventions can be tailored. Progress and outcomes can be assessed by re-administering ASEBA forms and comparing scores with intake scores.

Multicultural norms for the ASR and ABCL are detailed in the *Multicultural Supplement to the Manual for the ASEBA Adult Forms & Profiles*. The *Supplement* also details the DSM-5, *Obsessive-Compulsive Problems (OCP)*, and *Sluggish Cognitive Tempo (SCT)* scales, plus the MFAM, as well as ASR and ABCL findings from many studies.

- Adults complete the ASR to report their own adaptive functioning, problems, strengths, and substance use
- People who know the adult complete the parallel ABCL
- **Adaptive Functioning and Strengths Scales:** *Education; Friends; Spouse/Partner; Family; Job; Personal Strengths*
- **Syndrome Scales:** *Anxious/Depressed; Withdrawn; Somatic Complaints; Thought Problems; Attention Problems; Aggressive Behavior; Rule-Breaking Behavior; and Intrusive*
- **DSM-5-oriented Scales:** *Depressive Problems; Anxiety Problems; Somatic Problems; Avoidant Personality Problems; Attention Deficit/Hyperactivity Problems (Inattention and Hyperactivity/Impulsivity subscales); and Anti-social Personality Problems*
- **Substance Use Scales:** *Tobacco; Alcohol; Drugs*

Brief Problem Monitor

For Ages 18-59 (BPM/18-59)

Standardized assessment of client progress is increasingly required by accrediting agencies and 3rd-party payers. To meet such requirements, the BPM/18-59 obtains self-ratings and ratings by collaterals (spouse, partner, family members, friends, therapists, inpatient staff) on 18 problem items that have counterparts on the ASR and ABCL. Completed in 1-2 minutes, the BPM/18-59 assesses functioning over user-specified periods of days, weeks, or months. The 18 items are scored on Internalizing (INT), Attention Problems (ATT), Externalizing (EXT), and Total Problems (TOT) scales.

Linking the BPM/18-59 with Comprehensive Intake and Outcome Assessments

Brief assessments need to be linked to comprehensive intake assessments that identify the problems on which interventions should be targeted and to comprehensive outcome assessments that provide evidence for improvement. Because the BPM's items and scales have counterparts on the ASR and ABCL, BPM scores can be calibrated with intake and outcome ASR and ABCL scores.

Cross-Informant Comparisons

The BPM/18-59 software compares item ratings and scale scores across up to 4 informants on each rating occasion.

For additional information,
visit www.aseba.org/adult-bpm18-59/

Trajectories of Scale Scores

The software displays trajectory graphs of scale scores obtained on up to 10 occasions.

The Importance of Norms

To help users evaluate scale scores, the BPM/18-59 software displays *T* scores based on gender, age, and informant-specific norms (self, collateral). Multicultural options enable users to select norms for many societies. Graphs indicate scores that are high enough to be of concern ($T \geq 65$).

Informant Comments & User-Added Items

Informants can write comments to be entered and stored in the BPM/18-59 software. Users can add up to 3 problems and/or strengths to be rated and displayed in output.

View BPM/18-59 manual at
aseba.org/adult-bpm-18-59-manual-pdf/

ASEBA Guides

Specialized Guides are available for medical, school-based, child/family service, and mental health practitioners, gender-inclusive, family, and multicultural assessment, DSM-oriented scales, and ages 18-90+. Guides include: explanations of instruments and procedures for use in particular contexts; illustrations of profiles; cross-informant comparisons; case examples; data-processing options; and annotated bibliography. The Guides are to be used in conjunction with the Manuals, which provide detailed documentation for each form.

023	OABCL/60-90+ Hand-Scoring Syndrome and Adaptive Profiles for Women (50/pkg)	\$40/pkg
028	OABCL/60-90+ DSM-oriented Profiles for Men and Women (same for both genders) (50/pkg)	\$40/pkg
011	OASR/60-90+ (50/pkg)	\$40/pkg
012	OASR/60-90+ Hand-Scoring Syndrome and Adaptive Profiles for Men (50/pkg)	\$40/pkg
013	OASR/60-90+ Hand-Scoring Syndrome and Adaptive Profiles for Women	\$40/pkg
014	OABCL & OASR/60-90+ Reusable Hand-Scoring Templates (same for both forms and genders)	\$9
018	OASR/60-90+ DSM-oriented Profiles for Men and Women (same for both genders)	\$40/pkg

The Older Adult Self-Report (OASR) obtains older adults' ratings of diverse aspects of adaptive functioning, strengths, and problems from their own perspective. The *Older Adult Behavior Checklist* (OABCL) is a parallel form for obtaining responses from people who know the person being assessed.

Use of the OASR and OABCL can greatly improve intake, progress, and outcome assessments. Contexts include: psychiatric, psychological, and social work services; medical care, including routine care and evaluation of functioning following events such as strokes, falls, and illnesses; following significant life changes, such as loss of a loved one, moves to retirement communities, assisted living, and nursing homes; and evaluations before and after planned changes and interventions.

Multicultural Norms for the OASR and OABCL are detailed in the *Multicultural Supplement to the Manual for the ASEBA Older Adult Forms & Profiles*. The *Module with Multicultural Options for Ages 60-90+ (MMO/60-90+)* displays scale scores in relation to user-selected multicultural norms appropriate for the OASR completed by the person being assessed and OABCLs completed by people who know the assessed person.

- **Cross-informant comparisons** make it easy to see similarities and differences between self-reports and reports by other people
- **Adaptive Functioning & Strengths Scales:** *Friends; Spouse/Partner; Personal Strengths*
- **Syndrome Scales:** *Anxious/Depressed; Worries; Somatic Complaints; Functional Impairment; Memory/Cognition Problems; Thought Problems; and Irritable/Disinhibited*
- **DSM-oriented Scales:** *Depressive Problems; Anxiety Problems; Somatic Problems; Dementia* Problems; Psychotic Problems; and Antisocial Personality Problems*

* DSM-5 uses the term "neurocognitive disorders" but says that "dementia" is also acceptable. The other DSM-oriented scales are based on international experts' judgement of DSM-IV criteria that did not change materially in DSM-5.

Facilitating Evidence-Based Practice

Providers in the helping professions need extensive experience and skills. They also need practical tools for assessing clients' strengths and problems at intake, to evaluate progress, and to document outcomes.

ASEBA forms make it easy to assess clients' strengths and problems, as seen by clients and by people who know them. Scores for strengths and problems are displayed on profiles in relation to norms for the clients' age and gender, the role of the person who completed the ASEBA form (e.g., self, parent, teacher, spouse, partner), and user-selected multicultural norms.

Multicultural Family Assessment Module (MFAM) & Guide

The MFAM is especially helpful for comparing syndrome and DSM-oriented scale scores for 6-18-year-olds and their 18-59-year-old parents.

As shown below for Attention Problems, you can see variations in 11-year-old Max's scores on the CBCLs completed by his parents, TRF completed by his teacher, and YSR completed by Max. You can also see that the ABCL completed by Max's mom yielded an Attention Problems score in the clinical range for his dad. His dad's ASR yielded a score in the borderline clinical range. The ABCL and ASR scores thus revealed that Max's dad—like Max—may need help for attention problems.

Scores above the top broken line are in the clinical range for the CBCLs and TRF for Max, plus the ABCL for his dad. Scores between the broken lines are in the borderline range for Max's YSR and his dad's ASR.

The *Guide to Family Assessment* provides instructions for using the MFAM to assess children and parents. The *Guide* also provides case illustrations of how to present MFAM graphs to parents, if deemed appropriate by users. Showing MFAM graphs to parents can help them see areas in which they, as well as their child, may need help.

ASEBA Technical Support

ASEBA provides comprehensive technical support for form administration, scoring, and software. View frequently asked questions at <https://answers.aseba.org> and watch instructional videos at <https://howtovideos.aseba.org>.

- Setting up, installing software, logging in
- Administering and scoring forms
- Displaying scored profiles
- Advanced user and administrative tasks
- Importing and exporting records

ASEBA Scoring Software Overview

ASEBA-Web, ASEBA-PC, and ASEBA-Network all share the following features:

- Track and create scored reports of ASEBA forms, including preschool forms, school-age forms, adult forms, and older adult forms.
- Easily and quickly key-enter data obtained from paper forms using an easy-to-navigate user interface.
- Multicultural modules are available for all forms. Score data on ASEBA scales in relation to multicultural norms by selecting from one of 60+ available societies.
- Easy-to-read reports of normed scale scores and narrative reports exportable to screen, printer, and PDF formats.
- Profiles include competence, adaptive functioning, strengths, syndromes, DSM-oriented scales, Internalizing, Externalizing, Total Problems, and Other Problems.
- Item ratings are displayed with each profile, enabling you to quickly see both the profile pattern and the specific item ratings.
- Narrative pages display ratings for critical items that are of particular clinical concern.
- Access to Multicultural Family Assessment Module (MFAM).
- Cross-informant comparisons for all ages enable you to determine the degree to which each informant agrees with other informants' assessments.
- Trajectories of scores from Brief Problem Monitor (BPM) forms.
- Export raw and scored data for statistical analyses and other purposes. ASEBA scoring software enables exports to SPSS® and Microsoft Excel® formats.
- All data stored in ASEBA scoring software are fully encrypted using modern encryption techniques.
- All user interactions in ASEBA scoring software are fully logged and auditable in compliance with data protection laws, including HIPAA in the United States, GDPR in the European Union, and the Privacy Act 1988 in Australia.

ASEBA scoring software makes it easy to manage workflows and to produce comprehensive and clear profiles of normed scale scores and narrative reports. Each of our software offerings is tailored to your specific needs, whether you are a researcher, clinician, school practitioner, or working in a large health care network.

Comparison of Hand-Scoring to Scoring via Software (ASEBA-PC, ASEBA-Network, and ASEBA-Web)

Forms	Component	Hand-Scoring	Scoring via Software
All Ages	Data Entry	*Manual data transfer to paper profiles /Time intensive/Risk of more errors than with software	Key entry/Saves time/Minimizes errors
All Ages	Profiles	Need to manually score paper profiles	Created automatically when form is scored
All Ages, MFAM	Cross-informant comparisons with color bar graphs	None	Created automatically when form is scored
All Ages, MFAM	Narratives/Summaries	None	Created automatically when form is scored
All Ages	Long-term data storage to enable longitudinal comparisons	Not available	Available
All Ages, MFAM	Multicultural Scoring	Not available	Available
Ages 1½-5	Stress Problems scale	Not available	Available
Ages 6-18	Obsessive-Compulsive Problems, Stress Problems, Sluggish Cognitive Tempo (not on YSR), Positive Qualities (YSR only) scales	Not available	Available
Ages 18-59	Obsessive-Compulsive Problems, Personal Strengths, Sluggish Cognitive Tempo	Not available	Available
Ages 6-59	Multicultural Family Assessment Module (MFAM)	Not available	Available

* Users can place a reusable cardboard template on completed ASEBA forms to guide manual transfer of data to paper profiles.

ASEBA-Web

For additional information, see www.aseba.org/aseba-web/

ASEBA-Web cloud-based technology provides the same scoring and reporting of forms as other ASEBA software. In addition, it provides the administration of ASEBA forms on-line. ASEBA-Web is secure and fully compliant with regulations for data protection such as HIPAA in the United States, GDPR in the European Union, and the Privacy Act 1988 in Australia.

ASEBA-Web is a subscription service that is renewable on an annual basis.

ASEBA-Web charges e-units for certain tasks performed in the system. A single e-unit is charged for each of the following:

- Creating a form either for online completion by an informant or for key-entry.
- Printing a paper form for manual completion by an informant.
- Scoring a form to produce profiles and a narrative report.

In addition to all the features provided by ASEBA-PC and ASEBA-Network, ASEBA-Web has the following additional features:

- The cloud-based ASEBA-Web system is administered by ASEBA, freeing you from the need to install software and maintain your own infrastructure.
- ASEBA-Web is available on any device with a modern web browser and access to the Internet.
- ASEBA-Web is fully secure, using modern data encryption both at rest and in transit, keeping your data safe.
- Security for ASEBA-Web includes an option for multifactor authentication.
- Users can email links to informants directly from ASEBA-Web to fill out forms online.
- Informants can fill out forms online from any device with a modern web browser.
- Online entry by informants has been optimized for a variety of screen sizes, including on phones and tablets.
- Online forms are available in multiple languages. ASEBA-Web also enables printing of paper forms in over 100 languages. See www.aseba.org/aseba-web-translations/.

Item #	ASEBA-Web	Cost
098	ASEBA-Web 1-year subscription (includes 50 starter e-units)	\$145
98RE	1-year renewal of ASEBA-Web w/15 e-units (Annual renewal saves your data and e-units from prior year)	\$135
Item #	E-units for ASEBA-Web and P&O App	Cost
091	100 e-units package (95¢ per e-unit)	\$95
092	500 e-units package (90¢ per e-unit)	\$450
093	1,000 e-units package (85¢ per e-unit)	\$850
094	5,000 e-units package (70¢ per e-unit)	\$3,500

ASEBA-PC

For additional information, visit www.aseba.org/aseba-pc/

ASEBA-PC software makes it easy to manage intake, progress, and outcome data obtained with ASEBA forms. Multicultural modules are available for preschool forms (CBCL/1½-5-LDS, C-TRF/1½-5), school-age forms (CBCL/6-18, TRF/6-18, YSR/11-18, BPM/6-18), adult forms (ABCL/18-59, ASR/18-59, BPM/18-59), and older adult forms (OABCL/60-90+, OASR/60-90+).

The MFAM enables you to enter, score, and compare data from the CBCL/6-18, TRF, YSR, ASR, and ABCL, with multicultural options.

- ASEBA-PC creates easy-to-read intake, progress, and outcome profiles of normed scale scores and narrative reports exportable to screen, printer, TIFF, and PDF files, including A4 and U.S. paper sizes.
- Profiles include competence, adaptive functioning, syndromes, DSM-oriented scales, Internalizing, Externalizing, Total Problems, and Other Problems.
- Item ratings are displayed with each profile, enabling you to quickly see both the profile pattern and the specific item ratings.
- ASEBA-PC has multicultural options for all ages and the MFAM.
- Narrative reports display ratings for critical items that are of particular clinical concern.
- Modules display cross-informant comparisons of data from up to 10 forms, including item ratings, correlations between informants, and bar graphs of scale scores. (BPM displays cross-informant comparisons of 4 forms.)
- Data entered via ASEBA-Web (p.15) can be downloaded for unlimited scoring via ASEBA-PC.
- Export data for statistical analyses and other purposes.

System Requirements

Windows® 8, 10, or 11, 1GB of available RAM, 2GB of available disk space, and 2 cores. ASEBA-PC is **not** compatible with Apple workstations unless it is run with virtualization software that contains Windows.

For free electronic delivery of an item, please use the item number denoted in (), in red, and ending in "E"

Item #	ASEBA-PC	Cost
Prices for individual ASEBA-PC Software modules are listed with the products scored by the modules.		
Note: Forms are sold separately and are not included with ASEBA-PC software, except in computer scoring starter kits.		
052	Full ASEBA-PC SET Save \$445! Includes MFAM, Ages 1½-5, 6-18, 18-59, 60-90+, BPM/6-18, and BPM/18-59 (052E)	\$1,215

ASEBA-Network

For additional information, visit www.aseba.org/aseba-network/

ASEBA-Network software makes it easy to manage and score ASEBA forms from multiple workstations connected to a single database hosted by the customer on their internal network. ASEBA-Network provides a secure connection to an encrypted database. It is configured to run on a single server, or on separate servers for web and database components. Scoring modules are available for ASEBA preschool, school-age, BPM/6-18, adult, BPM/18-59, older adult forms, and MFAM.

System Requirements

Windows® Server 2012 R2, IIS 7.5+, SQL Server 2012 or SQL CE. More recent versions of these components are also supported. Hardware should have 2 cores, 1GB of RAM, and 2GB of disk space. Virtual machines are supported.

SCICA Semistructured Clinical Interview for Children & Adolescents

For additional SCICA information, visit www.aseba.org/school-age-scica/

The SCICA maximizes the value of interviews with a flexible user-friendly protocol, plus forms on which interviewers rate their observations and children's self-reports during the interview.

- The SCICA Protocol provides open-ended questions covering children's activities and school performance, peer relations, family relations, self-perceptions, feelings, and parent/teacher-reported problems
- Interviewers rate the child on the SCICA Observation and Self-Report Forms
- Scored on eight empirically based syndromes and six DSM-oriented scales, *Internalizing*, *Externalizing*, and *Total Problems*
- **Syndrome Scales:** *Anxious*; *Withdrawn/Depressed*; *Language/Motor Problems*; *Attention Problems*; *Self-Control Problems*; *Anxious/Depressed*; *Aggressive/Rule-Breaking*; and *Somatic Complaints*
- Normed on 686 clinically referred children, with separate profiles for ages 6-11 and 12-18

- **DSM-oriented Scales:** *Affective Problems*; *Anxiety Problems*; *Attention Deficit/Hyperactivity Problems (Inattention and Hyperactivity-Impulsivity subscales)*; *Oppositional Defiant Problems*; *Somatic Problems (for ages 12-18 only)*; and *Conduct Problems*

For free electronic delivery of an item, please use the item number denoted in (), in red, and ending in "E"

Item #	Semistructured Clinical Interview for Ages 6-18	Cost
801	Protocol forms for use by interviewer (50/pkg)	\$40/pkg
802	Combined SCICA Observation and Self-Report rating forms (50/pkg)	\$40/pkg
805	SCICA Manual (available on CD, not hardcopy) 164 pp. (805E)	\$50
803	Profiles for Hand-Scoring SCICA (same for both genders). No template needed (50/pkg)	\$40/pkg
808	SCICA DSM-oriented Profiles (same for both genders). No template needed (50/pkg)	\$40/pkg

Test Observation Form (TOF) Ages 2-18

For additional TOF information, visit www.aseba.org/observational-assessments/

Ability and achievement tests pose significant challenges for children. The TOF enhances the value of test scores by documenting test examiners' observations of children's behavior during testing.

- The examiner briefly notes the child's behavior during testing. The examiner then rates the child on 125 problem items
- Norms are based on ethnically diverse samples of 3,943 children, with separate norms for boys and girls ages 2-5, 6-11, and 12-18
- **Empirically based scales:** *Withdrawn/Depressed*; *Language/Thought Problems*; *Anxious*; *Oppositional*; *Attention Problems*; *Internalizing*; *Externalizing*; and *Total Problems*
- **DSM-oriented scales:** *Attention Deficit/Hyperactivity Problems scale with Inattention and Hyperactivity-Impulsivity subscales*

For free electronic delivery of an item, please use the item number denoted in (), in red, and ending in "E"

413	TOF Hand-Scoring Syndrome Profiles for Girls including DSM-oriented scales (50/pkg)	\$40/pkg

Vital Tools for Assessing Progress & Outcomes

Funding agencies, third party payers, and accrediting bodies – such as the Joint Commission (www.jcrinc.com) – increasingly require progress and outcome assessments. ASEBA forms make it easy to compare functioning at intake, progress, and outcome assessments for diverse clients in diverse contexts.

ASEBA P&O App™

To tell providers whether changes in a client's scores exceed chance, the *P&O App* uses data scored by ASEBA-Web, -PC, or -Network to generate bar graphs of scores obtained at each assessment. Changes that exceed chance are flagged with asterisks, based on statistical tests performed by the *P&O App* (users do not need statistical skills). Providers can show clients the bar graphs and can use the graphs to document outcomes in client records. Outcome graphs are illustrated for ratings of 8-year-old Jeff, by his parents and teacher.

ASEBA Progress & Outcomes Manual

The *ASEBA Manual for Assessing Progress & Outcomes of Problems & Strengths* succinctly outlines procedures for assessing and comparing clients' functioning at provider-selected timepoints. The *Manual* illustrates how providers can compare intake, progress, and outcome scores obtained from self- and collateral-ratings. The *Manual* also illustrates how outcomes can be statistically compared for clients receiving different services.

The Achenbach System of Empirically Based Assessment (ASEBA): Development, Findings, Theory, and Applications

By T.M. Achenbach, Professor of Psychiatry and Psychological Science
University of Vermont

For additional information, go to www.aseba.org/aseba-origins/

Illuminates and integrates decades of work related to the ASEBA. The book traces major milestones in the ASEBA's conceptual, methodological, and theoretical development. It also elucidates applications to assessment, training, and research. Key topics include:

- Empirically based approach
- Quantitative aspects of assessment and taxonomy
- Developmental psychopathology
- Linking assessment and taxonomy
- From classification to quantification
- Accelerated longitudinal research
- Modeling phenotypic and genotypic interplays
- From cross-cultural to multicultural research
- Evidence-based assessment (EBA) for evidence-based treatment (EBT)
- From data to theory and back to data
